

SSB Battery SBL9-12L

The SSB Battery SBL9-12L is a sealed and maintenance-free AGM battery that impresses with its excellent discharge behaviour and a service life of 10 to 12 years in accordance with the EUROBAT directive. The battery is ideal for high-current applications in the UPS sector and for applications with a long autonomy time in the emergency and safety lighting sector.

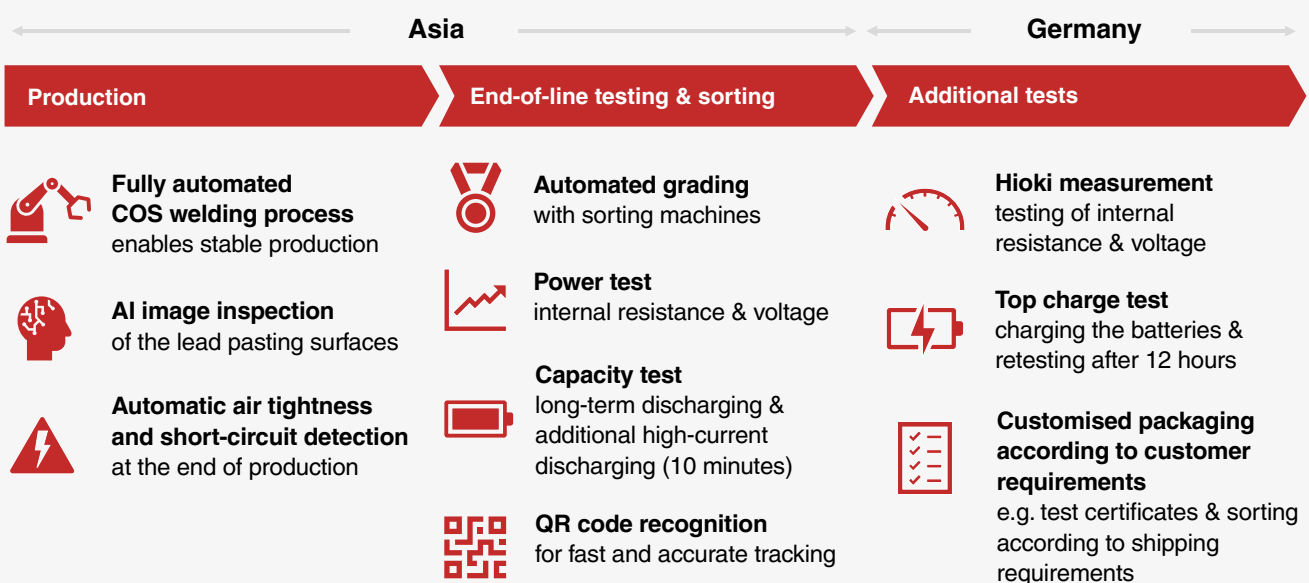

Product specifications:

- Lead-fleece battery (AGM)
- Capacity: 12 V 9 Ah (C20)/39 W per cell (15 min; 1.75 V)

New: Unique fully automated production!

Fully automated production enables a consistently homogeneous internal resistance. In addition, the improved grid and plate structure of our SSB Battery SBL9-12L achieves a significantly higher discharge current compared to technically equivalent batteries.

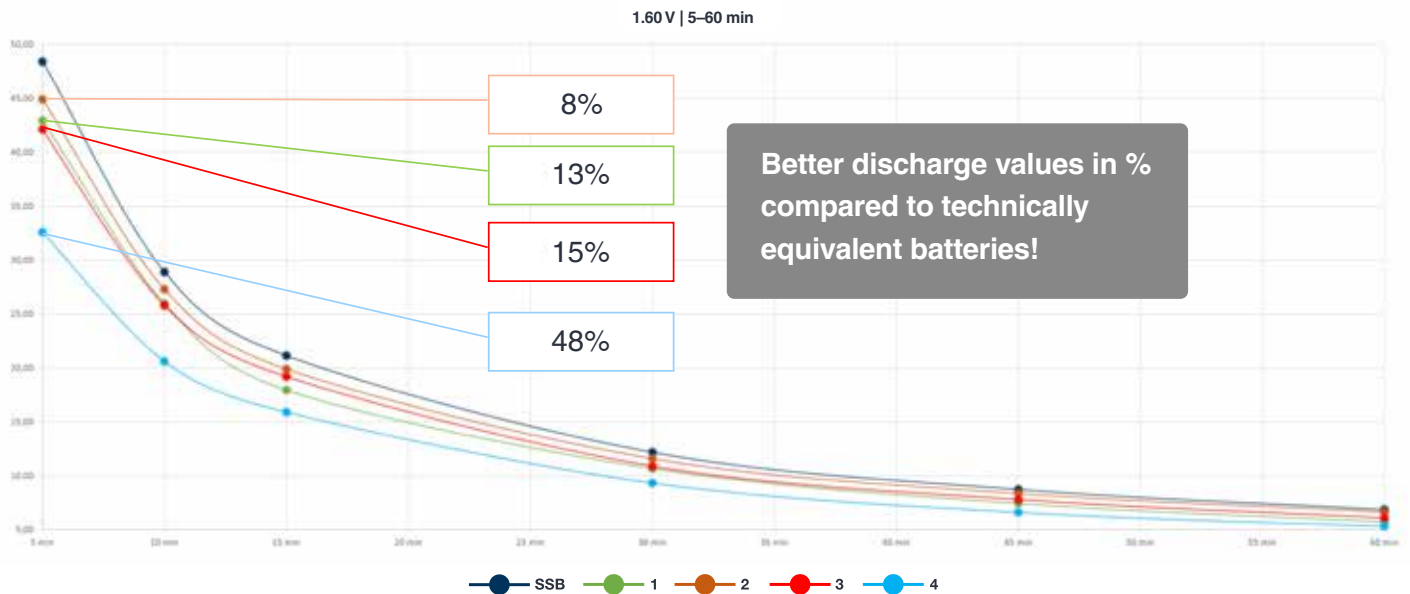

Automated quality monitoring and documentation after each work step

The best discharge values on the market!

Product comparison (ampere per cell)

Significant increase in quality thanks to standardised production and testing

Product advantages	SBL9-12L
Fully automatic production line	✓
Improved grid structures (more current per time unit)	✓
Adaptation to the higher outputs of smaller UPS systems	✓
Better discharge values (the best on the market)	✓
Homogeneous internal resistance	✓
Reliable performance	✓
No need for customer testing	✓
ABS housing	✓
10 - 12 years service life	✓
